SUMMARY

Computer Science graduate specializing in software development, full stack engineering, and machine learning, with hands-on experience building scalable applications and deploying ML models. Proficient in Java, JavaScript (ES6+), React.js, and REST APIs. Developed and deployed end-to-end projects integrating frontend, backend, and machine learning components using tools like Firebase and Streamlit. Adept at problem-solving and writing efficient, production-ready code, with a strong interest in building intelligent and high-performance software systems.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Bootstrap, Responsive Design

Backend: Core Java, JDBC, Servlets

Databases: MySQL, Oracle

Tools: Firebase, Git, GitHub, VS Code, Chrome DevTools

Concepts: OOP, REST APIs

EDUCATION

B. Tech in Computer Science (AI & ML), Godavari Institute of Engineering and Technology, Rajahmundry, AP CGPA: 7.5/10 | Graduated: 2026

PROJECTS

Titanic Survival Prediction App (Machine Learning | Streamlit Deployment)

Built and deployed a machine learning pipeline using Gradient Boosting to predict Titanic survival (~83% accuracy), with feature engineering and a Streamlit-based web app for real-time predictions. GitHub: [Tirth443/titanic-ml-project](https://github.com/Tirth443/titanic-ml-project)

Bank Account Simulator (Core Java)

Developed banking simulator with deposit, withdrawal, and balance modules; implemented validation and exception handling. Packaged and deployed the application as an executable JAR file for cross-platform compatibility and easy distribution. GitHub: [Tirth443/BankAccountSimulator](https://github.com/Tirth443/BankAccountSimulator)

Recipe List Web App (React.js)

Built responsive signup/login system with real-time validation reducing errors by 90%; deployed on Firebase. Managed login/logout flow using React Hooks and implemented input form checks for credentials like email, password, and contact details and field completeness, enhancing user experience and data integrity. Live: <https://recepies-e03fd.web.app/>

EXPERIENCE

Artificial Intelligence Trainee — AIMERS (Remote)

Engineered YOLOv8-based object detection achieving 92% accuracy and prepared frameworks for real-world deployment.

Intern — INTERNZ LEARN (Remote)

Worked with Generative AI, LLMs, prompt engineering, model fine-tuning, and deployed AI apps using Hugging Face, Llama, Streamlit.

CERTIFICATIONS

AWS Cloud Practitioner — APSSDC (2025)

React—AH Career Academy (2024)

SQL — AH Career Academy (2024)

Oracle Database — AH Career Academy (2024)

ADDITIONAL SKILLS

Soft Skills: Communication, Teamwork, Problem Solving
