SUMMARY:

Analytical and results-driven Data Analyst with strong skills in SQL, Power BI, Excel, and Python. Experienced in data visualization, reporting automation, and extracting meaningful insights from large datasets. Passionate about leveraging data to improve business performance and support informed decision-making.

TECHNICAL SKILLS:

Data Analytics: Power BI, SQL, Excel, DAX, Data Visualization, Data Cleaning, Data Modeling

Database: MySQL, Oracle SQL

Programming: Python, Pandas, NumPy

Business Intelligence: KPI Reporting, Dashboard Development, Data Storytelling

Tools: Power BI, Excel, MySQL Workbench, Git, GitHub

EDUCATION:

B. Tech in Computer Science (AI & ML), Godavari Institute of Engineering and Technology, Rajahmundry, AP CGPA: 7.5/10 | Graduation: 2026

PROJECTS:

- **HR Analytics Dashboard (Power BI | SQL | DAX)**

Developed an interactive HR Analytics Dashboard in Power BI to analyze employee attrition trends across 1,470 employees using KPI-driven reporting. Created DAX measures for Attrition Rate, Attrition Count, Average Age, Income, and Employee Tenure, enabling data-driven workforce insights. Built dynamic visualizations and filters to identify attrition patterns by department, job role, gender, age group, marital status, and overtime.

GitHub: <https://github.com/Tirth443/HR-Analytics-Dashboard>

- **Customer Churn Analytics Dashboard (Power BI, SQL, Excel, DAX)**

Transformed raw customer data into actionable insights through an end-to-end churn analytics solution using Power BI and SQL. Created dynamic dashboards to monitor customer retention, churn trends, and risk segments across 7,000+ records. Delivered business-focused visualizations that support strategic decision-making and customer retention initiatives.

GitHub: <https://github.com/Tirth443/Customer-Churn-Dashboard>

- **Titanic Survival Prediction App (Machine Learning | Streamlit Deployment)**

Built and deployed a machine learning pipeline using Gradient Boosting to predict Titanic survival (~83% accuracy), with feature engineering and a Streamlit-based web app for real-time predictions. **GitHub:** [Tirth443/titanic-ml-project](https://github.com/Tirth443/titanic-ml-project)

EXPERIENCE:

- **Artificial Intelligence Trainee — AIMERS (Remote)**

Analyzed and processed image datasets to support object detection model development and performance evaluation. Performed data preprocessing, model validation, and accuracy assessment, achieving over 90% detection accuracy. Collaborated on data-driven problem-solving tasks and interpreted model outputs to improve analytical decision-making.

- **Data Analytics and AI Intern — INTERNZ LEARN (Remote)**

Worked with structured and unstructured datasets to support AI and analytics-based applications. Conducted data preparation, exploratory analysis, and model performance evaluation using Python-based tools. Assisted in transforming data into actionable insights through reporting, visualization, and analytical workflows.

CERTIFICATIONS:

- AWS Cloud Practitioner – APSSDC
- SQL Certification – AH Career Academy
- Oracle Database Certification – AH Career Academy

ADDITIONAL SKILLS:

Soft Skills: Communication, Teamwork, Problem Solving.
